

XM Radio has been a blessing to me and my family. I now have uninterrupted radio of my choice. I pay for this service and have every right to listen to it. Local radio is full of commercials and trash that I do not want to listen to. Some of it should not be allowed on the airways.

My wife and I can now travel to the far parts of this great United States and still have the radio signal we choose and pay for. XM Radio has been great for us. While traveling, it is great to be able to get the instant traffic, weather conditions and the music or talk of our choosing. The local radios do not provide it or you have to wait until they feel like giving it to you after a long commercial.

I am in support of Satellite Radio as are many other Americans. Please reject the NAB's Petition 04-160. Restricting the present satellite frequencies would be a disservice to the thousands who presently listen and to those who will change when they are introduced to this valuable service.
